

Dear FCC Board and Directors,

A free and open Internet is integrals for the health and freedom of our democracy, businesses and the future of our nation. Encouraging Telecoms to have control over the content we see, and the domains they favor will not only hurt consumers – it will infringe on our freedom we enjoy, and our ability to choose as customers. Voters, businesses, journalists and more depend on a free and open Internet – a repeal of Net Neutrality means that the next Apple or Netflix could not have a fair shot of starting up – thus killing the American Dream.

Thank you for reading my brief, yet passionate comments. I urge you to not be bought and paid for by the Comcasts of the world.

Sincerely,

Nicole Klepper
